

### **Slushie Machine Instructions**

Office Phone 07 4422 7600

After Hours Phone 0487 006 895

*(Please note that all after hours call outs will be charged for)*

#### **Important**

Do not move machine once it has been placed

Barrels are FRAGILE. DO NOT lift from barrels. Lift from underneath machine.

ALL Damages will be at the hirers expense

#### **Before Use**

The water in the machine is for testing purposes

Please drain the water before use

#### **Instructions**

Add your slushie mix to the barrels

Recommended mix ratio is 1:4 – 1 Litre of slushie mixture to 4 Litres of water

If making your own flavouring, we recommend using something with a high sugar content to make the ice “ball” (e.g. lemonade) with some kind of flavouring (e.g. cordial).

\*Please note that for alcoholic beverages we recommend adding the alcohol to the drink after it has been poured into the cup, as alcohol can affect the freezing capabilities of the machine

Turn the machine on

For a slushie select the freeze option

Select the spin option

\*Please note that the machine will take 1-2 hours to freeze

#### **Cleaning**

Please run clean water through the machine after use and clean thoroughly

**DO NOT** attempt to pull the machine apart to clean
